Operating Instructions for the TAKE-A-LABEL Stainless Steel Label Dispenser

Note: The TAKE-A-LABEL dispenser is shipped mounted to a base to prevent shifting in the container.

- Remove the machine from the base.
 Always load the TAKE-A-LABEL dispenser with the On-Off switch in the (OFF) position.
- 2. To load a roll of labels on the TAKE-A-LABEL, loosen the unwind hub screw (57) on the unwind collar (56) and remove the collar, unwind washer, unwind spring, and disc from the unwind shaft.
- 3. Place the roll of labels on the unwind shaft between the two unwind discs. Place the roll with the beginning of the roll on the bottom with the web dispensing to your right as you face the side of the machine.
- 4. Replace the unwind disc, unwind spring, and collar onto unwind shaft. If using labels on a 3" diameter core, the hub on each disc will fit inside the core and support the roll of labels. If the labels are on a 1" core, simply slide the disc up snugly against the roll of labels. When the disc is in place, tighten the unwind hub screw against unwind shaft.
- 5. Thread the loose end of the labels under and up the front of the peel plate.
- 6. Pull the labels over the top of the peel plate far enough to reach the waste take-up roll.
- 7. Remove the waste wind clip, thread the label backing paper under the clip, and reinsert clip over loose paper.
- 8. Position the Photo Eye by loosening the wing nuts and moving assembly to the right or left, so the sensor is at or near the center of the labels. The Photo Eye can be tilted forward or backward by loosening the mounting bracket's vertical adjustment wing nut.

Model TAL-450-SS Shown

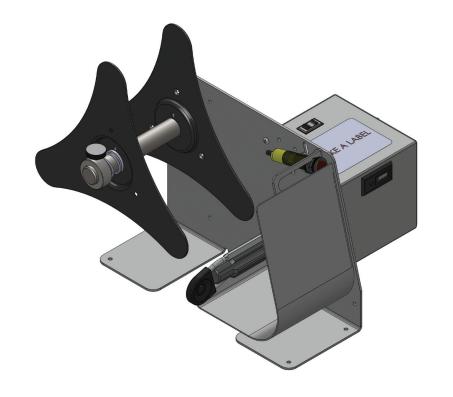

- 9. Turn on the On-Off switch. The waste wind shaft will turn, winding up the backing paper and dispensing a label at the top of the peel plate. When the Photo Eye senses the dispensed portion of the label, the motor will stop. As each label is removed, the machine will operate until the next label is in position to be removed. (CAUTION:) Turn off switch before removing wound up waste.
- 10. If the labels tend to follow the backing paper over the top of the peel plate instead of peeling off, then there is insufficient tension on the web of the labels. The shaft adjustment collar should be moved in to put more tension on the web.
- 11. If the motor stalls it may be necessary to move the shaft collar out to reduce the amount of unwind tension.

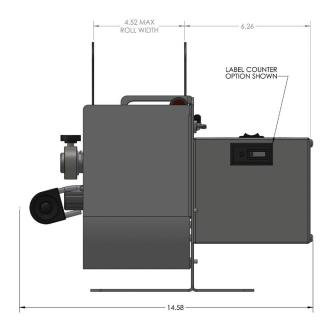

Operating Instructions

General Specifications, Stainless Steel Dispensers

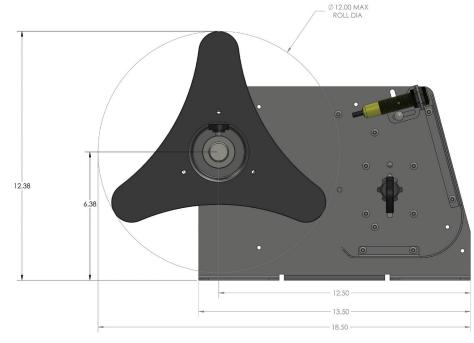

General Specifications, Model 450SS

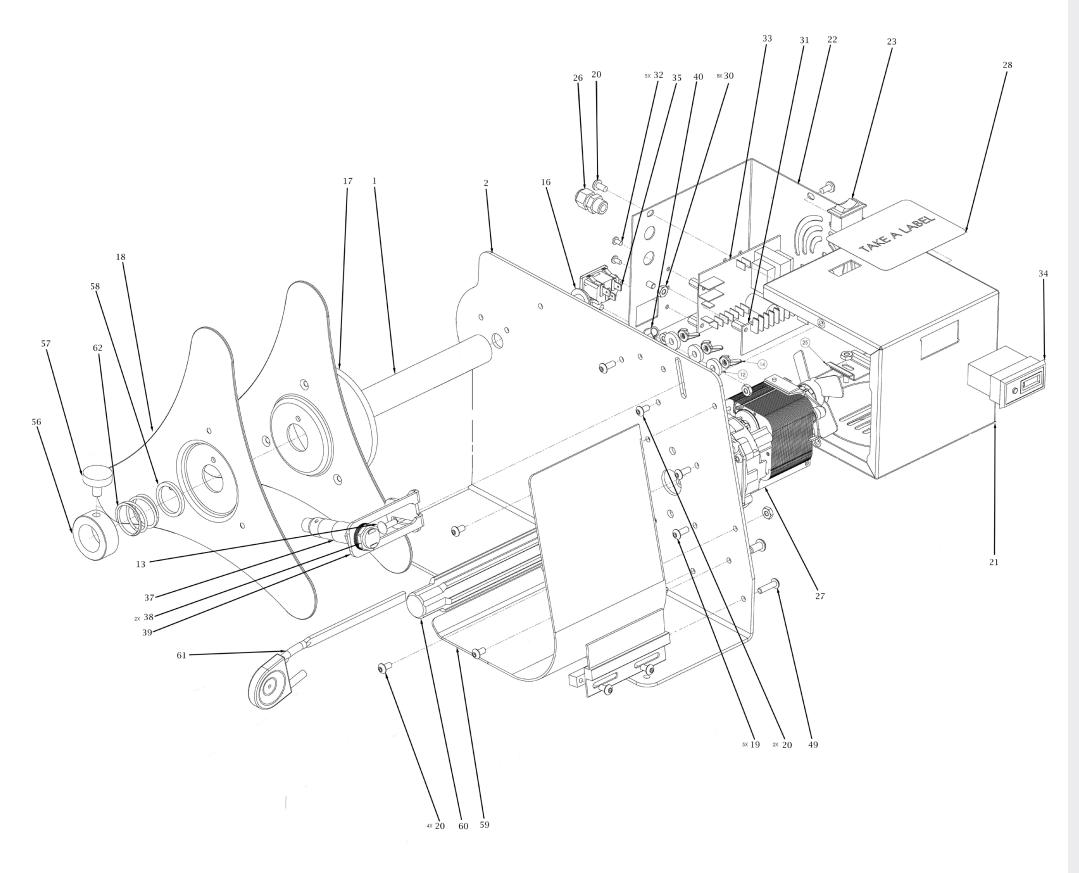

Size (Approx.): 14.58W x 12.38H x 18.50D Shipping Weight: 24 lbs (10.9 KG) Electrical: 110/120VAC, 50/60HZ,
